

MegaPath Retail Site SSL

MegaPath Retail Site SSL VPN Service delivers a secured access solution to your remote sites in an efficient, cost-effective manner.

Access Your Business Critical Applications Securely, Anytime

If you rely on critical software applications to manage your business, you can't afford to wait until tomorrow to get today's results. MegaPath Retail Site SSL enables you to securely access your real-time applications, such as point of sales systems, and other corporate resources, such as business reports, 24/7. Retail Site SSL leverages the MegaPath MPLS network already provisioned for your access and combines it with the leading SSL VPN technology to ensure you – and only you – gain access to your store results.

Manage Your Business from Anywhere

Do you know what's going on at all of your business locations when you're not there? Using the Retail Site SSL service enables you to access remote site applications, from various locations, without having to be onsite. Leveraging the leading SSL VPN technology, Retail Site SSL enables users to access store or restaurant applications from any device without pre-installing software on the computer or kiosk. You can check on your business at one store while physically sitting at another store, at home, at the office or even at the airport. You can preview your business and determine which location requires onsite supervision, allowing you to manage your time efficiently. You can even check on your store in the middle of the night, providing you with peace of mind.

Provide Remote Access to Corporate Resources

In addition to providing user access to applications in remote locations, your enterprise can take advantage of Retail Site SSL in other ways, too. Users working from home can remotely access corporate resources. When your employees are traveling, they can check email, access the intranet or other internal applications while at the airport or hotel.

Secure Remote Access

MegaPath Retail Site SSL

Enables access to business-critical applications

Allows access from any browser

Ensures only approved users gain access to applications

MegaPath Retail Site SSL

More Flexibility

By using MegaPath's User Management Portal, you can order Retail Site SSL for certain sites and create user accounts anytime.

Easy to Use

You can use any device from virtually anywhere to check on your business. You do not need to pre-install or maintain software on your workstation or a public kiosk, enabling you to securely access your financial information.

Secure

The Retail Site SSL uses granular access control rules to ensure only authorized users have access to your business information.
