

MegaPath Security Services Overview

**Comprehensive threat protection for
any size business**

The Security Challenge

Malicious traffic such as viruses, spyware, intrusions and service attacks are a constant threat to your company's network, data, time and employee productivity. As these threats grow in sophistication and severity, they can become an impossible challenge for your IT department and your budget to keep up with.

With MegaPath Managed Security services, you get complete around-the-clock protection against individual and blended threats without incurring the hassle, expense and complexity of a do-it-yourself approach. Built on our network of carrier-class gateways, our Managed Security services work as a complete solution or compliment your existing premise-based security equipment to stop malicious traffic before it consumes the bandwidth of your last mile circuit.

A Fully Managed and Integrated Solution

MegaPath Managed Security services protect your network with fully managed, 24x7 network security, monitoring, and support, and include Managed Firewall, Intrusion Prevention, Anti-Virus, Spam Tracker, Web Filtering, Personal Protection Suite, and IPsec, MPLS, and SSL VPN services. This turn-key solution allows you to protect your business assets and meet the requirements of regulatory and legislative security initiatives.

All MegaPath Managed Security services can be seamlessly integrated to simplify and unify security management and lower the cost of securing your network. Together, they reduce network complexity and provide easy and secure access to an increasingly mobile workforce. This unified approach offers more protection than your premise-based solution can provide alone and requires no additional equipment to buy or people to hire. We implement, host and monitor the solution around the clock, 24x7x365 -- all for one predictable monthly flat fee.

MegaPath Managed Security Services Benefits

- Turn-key deployment means no additional equipment to buy or employees to hire
- Reduces network complexity by eliminating multiple point solutions
- Lowers total cost of ownership
- Protects your business continuity, company assets and brand reputation
- Helps maintain compliance with government regulations
- Improves network uptime and performance via 24x7x365 proactive monitoring and management
- Continually updated signature lists and databases provide the most aggressive threat identification and elimination.
- Reduce threat gap via rapid threat solution discovery, development and automatic updates
- Comprehensive reporting aids in developing best practices and security policies

MegaPath Managed Security Services

MegaPath Managed Security services provide a comprehensive multi-layer security approach that work together to minimize down-time from individual threats, reduce risks with blended threats, and coordinate security alerting, logging and reporting.

Managed Firewall: A first line of defense against intrusions, the MegaPath Managed Firewall filters your network traffic to protect against potentially harmful threats.

Intrusion Prevention: The MegaPath Intrusion Prevention service protects against known attacks with an extensive attack database of the latest security threats.

Anti-Virus/Anti-Spyware: MegaPath Anti-Virus provides real-time protection against viruses, worms and spyware from both inbound and outbound security threats.

Spam Tracker: The MegaPath Spam Tracker service automatically detects and manages spam in real-time on end-user desktops and laptops.

Web Filtering: The MegaPath Web Filtering service uses multiple filtering techniques to offer businesses of all sizes an easy way to enforce Internet usage policies and control access to the Web.

Site-to-Site IPsec VPN: MegaPath Site-to-Site IPsec VPN service securely connects your sites over the internet so you can safely share files and applications among offices.

Site-to-Site MPLS VPN: MegaPath Site-to-Site MPLS VPN service connects your sites over a private network and enables you to prioritize business-critical applications.

Managed SSL VPN: MegaPath's Managed SSL VPN services provide secure clientless access to any application from any device with granular access control policies.

Personal Protection Suite: MegaPath Personal Protection Suite provides firewall, intrusion prevention, anti-virus, anti-spyware and other protective services on PCs, laptops and Windows-based POS systems.
