

## MegaPath Wireless Broadband Backup

MegaPath Wireless Broadband Backup helps companies maintain critical connectivity at fast broadband speeds

### High Speed Backup Connectivity

MegaPath Wireless Broadband Backup provides secure access to your network and the Internet at broadband speeds even when your primary connection is unavailable. Available to businesses that have MegaPath's Site-to-Site MPLS VPN service, it supplies the bandwidth to support your business applications even during times of primary connection failures. MegaPath Wireless Broadband Backup automatically sends traffic when your primary access connection fails, with no action required from you or MegaPath. MegaPath configures Customer Premise Equipment to detect when the primary connection is down, and then routes all traffic over the wireless connection, providing you with uninterrupted service and enabling your employees and applications to continue to perform at broadband speeds while accessing the Internet or your corporate VPN.

**MegaPath Wireless Broadband Backup** is an excellent match with your existing T1, DSL, or cable service. In addition, MegaPath will deploy all the necessary equipment and set up the service, and will then manage and monitor the network for you. And MegaPath also uses IPsec encryption to provide PCI-compliant security.

### Why MegaPath Wireless Broadband Backup?

- Provides automatic failover to backup connection during instances of primary connection outage
- Enables you to continue operating at broadband speeds while on a backup connection
- Provides increased availability and productivity
- Delivers higher performance than Dial-backup
- Offers multiple plans—including unlimited usage and pooled usage
- Pooled usage plans are less expensive than POTS line with Dial-backup
- A diverse path isn't reliant on a terrestrial plant—service is available even if the entire Central office is down
- Fully Monitored and Managed—Lets You Focus on Your Business

### Wireless Broadband Backup Plans Unlimited Usage Plan

- Predictable flat rate bill with no usage fees
- Recommended for customers with less than 25 locations

### Pooled Usage Plans

- Monthly data transfer plans—10MB or 20MB plans available
- Usage is pooled across all locations to minimize usage charges
- Plan sizes based on customer applications and number of locations
- Available for customers with more than 25 locations
