

## Mobility Services Product Suite

Secure managed remote access solutions  
for businesses of all sizes.

### Flexibility to Securely Connect Anywhere, All the Time

To stay competitive, businesses today need to provide internal employees and external third-party users with continuous access to corporate resources whether on the road, at a remote office or at home. The MegaPath Mobility Services Product Suite makes remote access safe and easy for businesses of all sizes by providing a secure, reliable connection to corporate resources through global dial-up, WiFi hotspots, hotel broadband access, nationwide 3G wireless access, and managed remote access VPN solutions.

In the world of remote access, MegaPath's Mobility Services Product Suite is in a league of its own. Boasting VPN technology from Juniper and SonicWALL, the world's largest global remote access network from iPass, and security software from IBM and VeriSign, no other managed service provider offers the simplicity, security and manageability required to protect your network. Unleash the productivity of your workforce with MegaPath's Mobility Services Product Suite today.

### A Trusted Partner With The Right Expertise

MegaPath is committed to working closely with your staff to provide the most flexible and secure solution. At the core of MegaPath's Mobility Services Product Suite is the expertise we provide implementing and managing the right solution to meet your corporate needs. As a leading independent provider of Managed IP services in North America, we understand the challenges IT administrators face in delivering a secure remote access solution to corporate users. MegaPath enlists industry leading technology to deliver each service, though it is our total integrated and managed solution that differentiates us from other service providers.

### Realize the Full Benefits of Managed Remote Access

**Ease of Use** – Simple, easy-to-use clientless or client-based solutions provide remote users with secure global Internet and/or VPN access.

**Security** – MegaPath combines best-practice expertise with industry leading security technologies from Juniper, SonicWALL, IBM and VeriSign to ensure your mobility solutions protect your corporate resources, assets and network.

**Reach** – Access the largest dial and broadband roaming data network with over 28,000 dial-up numbers and over 95,000 Wi-Fi and wired broadband locations globally, plus nationwide 3G wireless access.

**Flexibility** – Combine managed VPN, access, and security software solutions to meet your corporate needs, all with fast implementation and deployment and no capital expenditure.

**Managed** – Ease the burden on your IT staff and receive the highest levels of service and security when MegaPath implements, hosts and manages the services for you.

## Corporate Access SSL VPN

MegaPath is the leading provider of managed SSL VPNs worldwide, with over 250,000 active users. We use industry-leading Juniper and SonicWALL technologies to provide granular access control to your VPN. Offered as a clientless or client-based solution, this user-friendly technology gives your employees and business partners secure access to all of your business-critical applications for a predictable, flat monthly service charge.

## Global Remote Access Service

Powered by iPass, our multi-carrier platform boasts over 28,000 access numbers and 95,000 Wi-Fi and wired broadband locations worldwide, plus 3G wireless access throughout the U.S. to provide your users with a reliable connection every time. A simple phonebook quickly finds the best access option and is updated automatically to provide the most up-to-date area listings. Our mobility client provides the ability to ensure that security software such as antivirus and personal firewalls are active before allowing VPN access and remain active throughout the session.

## Personal Protection Suite

MegaPath understands that protecting your company's data and network are critical and that remote access can introduce further threats. For a layered approach to securing remote PCs before allowing connectivity to the corporate network, MegaPath offers the Personal Protection Suite. This fully managed software is powered by IBM and includes a firewall with intrusion prevention and detection, virus prevention and memory protection.

## About MegaPath

Founded in 1996, MegaPath is relied on by over 22,000 business customers at over 70,000 business locations. MegaPath offers a wide range of nationwide broadband connectivity and managed services for small businesses and larger, all the way up to Fortune 500 enterprises.
