

MegaPath Compliance Services

Solve Tough Security Issues

Solve Your Tough Security Issues and Maintain Compliance

Managing risk, security, and compliance in today's threat-based environment can be a juggling act at best. Doing more with less has become the norm and with continuously evolving compliance requirements, IT teams are finding it nearly impossible to keep up. MegaPath's Compliance services are designed to solve some of the tougher issues—including log management, vulnerability management, and security information—that IT departments face. Our Compliance services meet numerous regulatory requirements—including FFIEC/NCUA, HIPAA/HITECH, GLBA, and SOX.

Log Management

MegaPath's Managed Logging service is a cloud-based offering that securely collects, analyzes, reports, and stores log data from MegaPath-provided or customer-owned security devices and network infrastructure. The service uses an agentless approach to log collection that is rapidly deployable and scalable in all customer environments.

Vulnerability Management

MegaPath's Vulnerability Scanning service (VSS) provides Web-based scanning tools for unlimited external scanning by the customer. The service provides detailed scan reports and priorities on identified vulnerabilities that can be remediated by the customer or MegaPath.

Security Information Management

A secure portal is included at no additional cost with the purchase of either Managed Logging or VSS. It provides case management, workflow, and log or vulnerability issues reporting that can be used to track remediation activities, as well as create reports for audits and assessments.

Benefits

- ▶ Reduces costs
- ▶ Improves security
- ▶ Simplifies compliance
- ▶ Provides 24/7/365 coverage
- ▶ One monthly bill
