

# MegaPath Data Backup

## Simple, Secure, Affordable

## Military-grade Encryption, World-Class Data Centers, and the Strictest Security Policies

MegaPath Hosted Data Backup for servers and desktops saves your business time and money with simple, secure, and affordable backup solutions. We can get you up and running in no time so you can focus on growing your business. And backups can be configured to run at specific times of day, including after business hours, to eliminate resource strain and costly manual oversight.

### Backup Made Easy

Protect your business by backing up your data remotely over the Internet. Our service backs up server-specific applications, including:

- ▶ Network shares
- ▶ All versions of SQL Server and Exchange Server
- ▶ SharePoint
- ▶ Active Directory
- ▶ Com+ Services
- ▶ SYSVOL directory share
- ▶ Windows Registry Database

### Fast

**Data Shuttles:** MegaPath can send an external storage device for faster initial backup of large amounts of data. Copy your files, return the drive, and we'll upload it locally in our data center.

**Incremental Backups:** Once initial backup is complete, our server only backs up new or changed portions of files, saving bandwidth and making subsequent backups lightning fast.

### Simple

**Automatic or Scheduled Backups:** Set the service to back up automatically or according to your own schedule.

**Custom Configurations:** Set policies on bandwidth usage and backup speeds, create custom backup sets, and refine what file types should be backed up.

**Reliable Data Restores:** Browse and search your backed up files. Restore file versions up to 90 days in the past. Files may be restored via software client, Web, our mobile device App, or by ordering a DVD restore.

**Local Backup:** Windows users back up locally to an external device and online for double protection by using the 2X protection option.

## Benefits

- ▶ Hassle-free automated backup
- ▶ Self-service restore keeps you in control
- ▶ 90-day versioning lets you restore prior versions of files as needed
- ▶ Real-time file sync provides virtually up-to-the-minute backup

## Secure

**Encryption:** All user data is encrypted locally with military-grade encryption prior to transfer. When you select your own Encryption Key, even MegaPath cannot access your data.

**World-class Data Centers:** Data is stored in state-of-the-art data centers, which employ the highest security standards.

**Audits and Certifications:** Our service is SOC 1 SSAE 16 Type 2 Compliant and ISO 27001 Certified.

**Near Continuous Data Protection:** Our service automatically detects and backs up new and changed files.

## Flexible

**Mobile App:** Access your data from any iOS or Android device with our free mobile App.

**SQL Server, Exchange Server, SharePoint, and Network Drive Support:** Our service backs up all open and locked files as well as common business applications running on Windows servers.

**Windows, Mac, and Linux Support:** Our service supports versions of Windows and Mac operating systems supported by the respective software maker as well as the following Linux distributions: CentOS, Debian, Red Hat, and Ubuntu.

**Open and Locked File Support:** Our service backs up all open and locked files, including Outlook PST files.

## The MegaPath Advantage

### Complete Service Portfolio

We offer a full range of business voice, data, security and hosted IT services.

### Proven Expertise

We've been serving businesses with innovative communications services since 1996.

### One Provider. One Bill.

Reduce the time, cost and complexity of managing multiple providers and bills.
