

## Load Balancing & Managed Failover

Optimize Network Traffic. Avoid Disruptions.

Load Balancing and Managed Failover provides the diverse connectivity you need to keep business running.

### Pervasive Connection for Always-on Business

Even the most resilient business-class Internet connection can fall victim to spikes in network traffic, a natural disaster, or a cut fiber line. The good news is that you can safeguard your business against disruptions. By relying on MegaPath's Load Balancing and Managed Failover solution, you ensure a resilient, continuous connection to access your data, support your applications, process your transactions, and serve your customers in the event of a slowdown or outage.

### Optimal Performance for your Applications

MegaPath Load Balancing and Managed Failover combines multiple Wide Area Network (WAN) links into a single high-speed interface. The service detects issues and automatically balances your network traffic for the optimal connection experience. Policies for Quality of Service (QoS) and traffic shaping ensure that your VoIP and other real-time applications get priority on your network.

### Seamless Failover / Failback

In case of an outage on one of your circuits, the service immediately switches to an alternate to keep your business operational. The service reverts to primary access as soon as the primary service is restored.

### Features for Your Mission-Critical Networking Needs

- ▶ Fully managed. We'll help you set up your load balancing and failover policies
- ▶ Multiple uplink ports
- ▶ 3G/4G modem support
- ▶ Warm spare failover if requested
- ▶ Smart connection monitoring: automatically detects Layer 2 and Layer 3 outages
- ▶ Fast, seamless failover
- ▶ Includes support for Managed IPsec VPN and Managed Firewall capabilities
- ▶ On the same appliance, you can also add fully managed Unified Threat Management

### Benefits

- ▶ Protection against network slowdowns and disruptions
- ▶ Continuity of business-critical applications
- ▶ 24/7/365 enterprise-class customer care

### The MegaPath Advantage

#### Diverse connectivity options

Plans available nationwide to fit your business and your budget.

#### One provider. One bill.

Reduce the time, cost and complexity of managing multiple providers and bills.

#### Responsive Support

Get dedicated account management for life, and expert support from talented customer service staff.

#### Complete Service Portfolio

We offer a full range of business voice, data, security, and hosted IT services.
