

MegaPath Remote Access SSL VPN

Secure, Reliable

A secure, cost-effective solution to meet the increasing demands of your mobile workforce.

With the increased adoption of dispersed workforces and awareness for disaster readiness protocols, businesses have a growing need for reliable and secure communications, as well as secure private networks. Remote Access SSL VPN enables your workforce to securely access mission-critical data, regardless of your employee's location or your business size.

Easy Remote Access From Any Location

Remote Access SSL VPN provides secure cloud-based, anywhere-access and extranet capabilities for authorized remote users. This includes access to applications and data files. Users can securely use any smartphone, tablet and/or any Web browser on their PCs to access the VPN, enabling them to check their email, calendars, and applications no matter where they are.

Simplify IT

Business owners and IT administrators need a proven, integrated SSL-based secure access solution that can be rolled out rapidly and managed with ease. With Remote Access SSL VPN, businesses eliminate the need to buy or manage a remote access system. Instead, MegaPath's team of experts handles the implementation and day-to-day management, freeing up your IT resources.

Speedy, Secure Network Integration

MegaPath's Remote Access SSL VPN services work in conjunction with your MegaPath MPLS network, and can be fully integrated into your network environment in significantly less time than it would take to build an infrastructure solution. Because all traffic over the MPLS VPN is encrypted using SSL, it is protected from unauthorized users. And, the solution includes complete monitoring and detailed reporting to help with regulatory compliance.

Benefits

- ▶ Supports a Mobile Workforce
- ▶ Reduces Total Cost of Ownership
- ▶ Scalable: Add Users to Support Growth
- ▶ Predictable User-based Cost Model
- ▶ Secure SSL-based Encryption
- ▶ 24/7/365 Network Monitoring, Management, and Support

Keep Your Business Operational

Since there is no need to distribute company-issued laptops and there is no software to permanently install and maintain, disaster recovery has never been easier. MegaPath Remote Access SSL VPN solutions are vital to keeping your business operating during a disaster, inclement weather, or other unforeseen events.

How It Works

Remote Access SSL VPN services enable employees to use almost any Web browser to securely connect to a network from any location.

- ▶ Helps businesses support a remote workforce by providing employees access to email, data, and network resources, regardless of an employee's location.
- ▶ Incorporates enterprise authentication tools and integrates with corporate standards and infrastructure (leverages existing Active Directories, such as LDAP, Radius, etc.)
- ▶ Works on any device (PC, Mac, Mobile).

The MegaPath Advantage
