

MegaPath SD-WAN

Simplify Network Management

Simplify branch-office networking. Guarantee delivery of real-time applications, like voice and video.

SD-WAN is today's popular approach to private networking because it's easy to deploy, easy to manage and much less expensive than traditional WAN deployments. It uses bandwidth more efficiently to ensure the highest level of application performance while lowering bandwidth and hardware costs.

MegaPath takes a best-of-breed, multi-vendor approach to our Managed SD-WAN offerings, giving you the flexibility to build the solution that's the right fit for your business needs, size and budget. We put over 20 years of network design and management expertise to work for you to configure, provision, support and monitor your network.

Simplify Branch-Office Networking

Provision branch offices faster with automated deployment, simplified configuration, and on-going monitoring with centralized troubleshooting tools. SD-WAN supports more economical broadband circuits than MPLS without sacrificing real-time application performance, which is a critical, cost-saving benefit, especially at the branch level.

Flexible Connectivity, Over-the-top or Bundled

Bring your own broadband or leverage our broad range of nationwide connectivity options – or do a combination of both.

Maximize Application Performance

SD-WAN provides consolidated monitoring and visibility across multiple WAN links and service providers. Assign application priority over multiple Internet links with direct, secure access to enterprise and cloud applications.

Fully-Managed Solution

MegaPath SD-WAN is a fully-managed service that includes full-solution design engineering, dedicated project management, and white-glove support from our team of U.S.-based network experts.

Why MegaPath SD-WAN

Simplify branch-office networking

Maximize application performance

Deliver SD-WAN over the top, or over our carrier-agnostic WAN connections, available nationwide

Focus on running your business, not your network, with our fully-managed service

Avoid the cost, hassle, and risk of DIY security and multiple standalone solutions

Eliminate security gaps and enforce appropriate use policies

SD-WAN: Flexible Feature Set for Every Business Need

MegaPath offers SD-WAN Pro and SD-WAN Enterprise packages, giving you the flexibility to build a solution that is the right fit for your business need, size and budget.

SD-WAN Features	SD-WAN Pro	SD-WAN Enterprise
IPsec VPN	✓	✓
Application Performance Monitoring	Session-level	Packet-level
Load Balancing	✓	✓
3G/4G Failover	✓	✓
Dynamic Path Selection/Bandwidth Aggregation		✓
Voice / Real-time Application Failover		✓
Forward Error Correction		✓
Managed Internet Access / Single Ingress IP		✓
Bi-directional Priority Routing		✓
High Availability (HA) CPE	✓	✓
Router / Firewall Configuration	✓	✓
Advanced Firewall and Unified Threat Management	Optional	Optional
Maximum WAN Links	2	6
Implementation Design and Engineering	✓	✓
Up/Down Link Monitoring	✓	✓
Proactive Circuit Restoration	✓	✓
Policy and Configuration Change Outsourcing	✓	✓
Branch Deployment Support	Optional	Optional
WiFi Management	✓	✓

The MegaPath Advantage

Complete Service Portfolio, Available Nationwide
MegaPath's award-winning, nationwide service portfolio includes Voice, Unified Communications, SD-WAN, WiFi, and Internet services

Proven Expertise

We've been serving businesses with innovative communications and networking services since 1996.

100% U.S. Based Expert Technical Support

Our knowledgeable technical experts respond quickly and efficiently 24/7/365.
