MegaPath Solutions for Restaurants
Reduce Technology Costs and Secure Data

Improve Performance, Secure Data, and Reduce Costs Across Locations

Modern voice and data communications services from MegaPath can help restaurant owners and managers:

- Pave the way for innovations such as tablet- and kiosk-based ordering and payment
- Secure transactions seamlessly
- Control costs with services that scale
- Comply with evolving Payment Card Industry standards and safeguard against data theft.

Business-class Internet & Continuity

Broadband Connectivity. MegaPath offers affordable broadband access types with nationwide coverage. Select the best-fit option for each location—all from a single provider.

Proactive Circuit Monitoring. Constantly checks the status of your MegaPath Internet connection—24/7/365. If we detect an issue, we will automatically contact you via email, create a trouble ticket, and quickly work to resolve the issue and minimize your network downtime. Using our self-service portal, you can stay in control of notification schedules and more.

Load Balancing & Failover. Provides the diverse connectivity you need to keep business running. Our fully-managed solution balances your network traffic between two or more WAN links for optimized application performance.

Managed WiFi, Networking & Security

Managed WiFi. With this fully managed, turnkey service for WiFi devices, MegaPath designs the network, provides the access points, and manages the service remotely so you don't have to. Managed WiFi supports the use of mobile point-of-sale and other devices to foster employee freedom of movement and efficiency. It can also provide a public wireless access point for guests, to encourage customer loyalty, repeat business, and mobile app marketing.

Advanced Security. MegaPath Advanced Security provides restaurants with best-of-class security protection. It delivers a comprehensive, multi-layer unified threat management platform to detect, block, log, and prevent cyber-attacks.

SD-WAN. Simplify branch-office networking and ensure guaranteed delivery of bandwidth-intensive applications, like point-of-sale, voice and video. MegaPath offers best-of-breed SD-WAN technologies, giving restaurant operators the flexibility to build the right solution for your business needs, size and budget.

Why MegaPath Solutions for Restaurants

Secure transactions

Safeguard against data theft
