# MegaPath Hosted Voice
How It Works

MegaPath Hosted Voice delivers more functionality than a traditional phone system, without the costs of managing and maintaining a PBX. It's a high-performance, no-maintenance Hosted PBX solution.

How It Works

Calling and Long Distance Plan
Choose your calling or long distance plan.

Company-wide Features
Services such as Auto Attendant and Hunt Groups are available as optional add-ons to your service, for use by your whole company.

Voice Gateway
When you purchase MegaPath as a fully managed service with MegaPath Internet, MegaPath provides the equipment that manages your voice and data traffic, ensuring that you experience the best possible call quality.

Broadband Connection
Select one of MegaPath's business-class broadband options, including DSL, T1, Bonded T1, and Business Ethernet. MegaPath's nationwide voice network ensures reliable service and consistently clear voice quality.

IP Phones
Select from a range of feature-rich, high-definition phones from Polycom and Cisco.

Employee Features
With over 50 basic and advanced features, MegaPath Hosted Voice is a complete solution that helps companies increase efficiency and work smarter than ever before. Basic and advanced calling features are included in the calling plans for each employee. Advanced features such as Visual Voicemail, Find Me/Follow Me and Hosted Voice Mobile help increase productivity and are part of the MegaPath Hosted Voice standard feature set. These advanced features are not available with traditional phone services.
